Exam 000-001

Fundamentals of Applying Maximo Enterprise Asset Management Solutions V2

Version: 5.0

[Total Questions: 123]

Question No : 1

A prospect uses a competing solution and frequently refers to a PDA application when discussing topics such as asset tracking using RFID.

Which two products from the IBM Maximo Asset Management solutions serve the same purpose? (Choose two.)

A. IBM Maximo Mobile Work Manager
B. IBM Maximo Mobile Audit Manager
C. IBM Maximo Mobile Asset Manager
D. IBM Maximo Mobile Inventory Manager
E. IBM Maximo Mobile for Asset Tracking

Answer: A,D

Question No : 2

A company just hired a new plant maintenance manager, and they are concerned about the number of corrupt asset records in the present system.In future they want to prevent this from happening.When implementing the new solution, what is recommended?

A. All maintenance personnel have full access to all records.
B. All maintenance personnel have read-only access to all data.
C. Only a very limited number of personnel have full access to static data records, but all maintenance personnel are able to enter work order data.
D. Maintenance personnel should not be using the system, and should only write entries on printed work orders and hireinput clerks to enter these into the system.

Answer: C

Question No : 3

What is a reason for using the ODBC reporting options?

A. Improve system performance.
B. Allow use of existing reporting capabilities.

C. Improve security issues with sensitive data.
D. Manage data integrity issues if outside reports allow data manipulation (add, edit, delete).

Answer: B

Question No : 4

A company wants to authorize select people to modify attributes of the asset specification on the asset record. Which three applications are used in combination to achieve this functionality? (Choose three.)

A. Persons
B. Security Groups
C. Application Designer
D. Database Restrictions
E. DB Configuration Application
F. Conditional Expression Manager

Answer: B,C,F

Question No : 5

In which module is a Request for Quotations created?

A. Asset
B. Inventory
C. Financial
D. Purchasing

Answer: D

Question No : 6

A key report produced by IBM Maximo Asset Management is the Work Order Detail

report.Which information is provided in this report?

A. a work breakdown structure, and associated tasks
B. the job, its tasks, and the planned labor for the job
C. the job, its tasks, and the completed labor for the job
D. a work breakdown structure, and detailed task descriptions

Answer: B

Question No : 7

A prospect uses a competing solution and frequently refers to the term "Wizard" when discussing topics such as moving an asset or re-associating it with a new user.

Which function within the IBM Maximo Asset Management platform serves the same purpose?

A. Job Plan
B. Workflow
C. Response Plan
D. Ticket Template

Answer: B

Question No : 8

How can custom business logic be developed in IBM Maximo Asset Management?

A. XML
B. DHTML
C. Java Class
D. Java Server Pages

Answer: C

Question No : 9

In addition to recording data about equipment and property, the management of which three items is also provided by IBM Maximo Asset Management? (Choose three)

A. union rules
B. spare parts
C. service contracts
D. fulfillment services
E. warranty information
F. construction permits

Answer: B,C,E

Question No : 10

A competitor claims that their product contains pre-built escalations and notifications that allows proper monitoring of service levels.

What should a solution advisor do when a customer is considering such a solution?

A. Dispute the vendor's claims that these pre-built escalations and notification even exist.
B. Inform the customer that service level management is an unimportant component in IBM Maximo Asset Management (IMAM).
C. Inform the customer that all vendors have the same pre-built escalations and notifications incorporated in their products.
D. Inform the customer that IMAM also includes pre-built escalations and notification that can be configured to meet their specific requirements.

Answer: D

Question No : 11

The Edit Rules dialog box in the Organizations application is used to specify which work order properties can be edited for a given work order status. For which three statuses can the Edit Rules be set? (Choose three.)

A. CAN
B. APPR
C. DRAFT

D. CLOSE
E. INPRG
F. WMATL

Answer: B,E,F

Question No : 12

A power company is interested in implementing IBM Maximo Asset Management (IMAM) at power plants at different locations in UK. Some of the tools used during maintenance, such as submersible pumps for dewatering of water intake channels in order to carry out maintenance on the circulating water pumps, are very expensive. A key business requirement is to monitor the usage and costs of these pumps, and at the same time to ensure that these tools are in perfect condition when required.

Which two suggestions should be provided to the client on how these tools can be set up in IMAM? (Choose Two.)

A. The tools should be set up as rotating assets, and preventive maintenance should be set up as per manufacturer's recommendations.
B. Define the tool rate by using the Tool/Organization Details action in Stocked Tools applicationso that the usage can be tracked when the tools are issued to the work order.
C. Define the tool rate by using the Tool/Organization Details action in Tools application so that the usage cost can be tracked when the tools are used against the work order.
D. The tools should be set up as rotating item, and it should be set up as a condition-enabled item. This ensures that tool usage is tracked based on the condition of the tool at the time of use.
E. The tool rate should be entered in the Issues and Transfer application when the tool is issued to the work order, and the rate automatically crosses over from the Tools application when the condition is entered.

Answer: A,C

Question No : 13

Which three statements are true for creating a Preventive Maintenance (PM) record? (Choose three.)

A. PM must have a route.

B. PM can have a location and a route.

C. PM can have an asset and a route.

D. PM must have an asset or a location.

E. PM can have an asset and a location at the same time.

F. PM can have an asset, a location, and a route at the same time.

Answer: B,C,D

Question No : 14

What are three average calculation methods that can be used for a continuous meter? (Choose three.)

A. All

B. Mean

C. Delta

D. Average

E. Sliding Days

F. Sliding Readings

Answer: A,E,F

Question No : 15

What are two ways that rotating asset can be created? (Choose two.)

A. by issuing a rotating item to the asset

B. by receiving a rotating item against a purchase order in Receiving application

C. by assigning a rotating item to an existing asset through Select Action in Asset application

D. by changing the status of the asset to INACTIVE and entering a rotating item in Rotating Item field

E. by creating a new asset and entering a rotating item in Rotating Item field before saving the asset

Answer: B,E

Question No : 16

Which two components of Business Intelligence Reporting Tool have been incorporated into the IBM Maximo Asset Management solution? (Choose two.)

A. NET SDK
B. Java SDK
C. Report Engine
D. Report Builder
E. Report Designer

Answer: C,E

Question No : 17

It is a key requirement at a client that no one except the HR personnel should be allowed to enter, view, and modify the Social Security Number on the Labor application. What can be used to achieve this objective?

A. Workflow, Security Groups, Application Designer
B. Security Groups, Field Control, Group Restrictions
C. Conditional User Interface, Security Groups, Application Designer
D. Conditional User Interface, Applications Restrictions, Database Configuration

Answer: C

Question No : 18

Which application is installed with IBM Enterprise Asset Management for providing reporting capability?

A. Open Database Platform
B. External Report Integration
C. Business Objects/Crystal Reports
D. Business Intelligence Reporting Tool

Answer: D

CERTKILL

Question No : 19

How can a customer run reports automatically on a specified frequency and interval in IBM Maximo Asset Management V7.1 solution?

A. No feature is available to define scheduling of reports.
B. Windows Scheduler is used to define scheduling of reports.
C. Reports Scheduling is used to define scheduling of reports.
D. Escalation application is used to define scheduling of the reports.

Answer: C

Question No : 20
