Answer: B

Explanation:

QUESTION NO: 4

Click the Exhibit button.

A company which is headquartered in New York also has three additional sites in Sacramento, San Francisco, and San Mateo. All four locations are connected by a wide area network. The customer wants to implement IBM Tivoli Provisioning Manager V7.2.0.2 (TPM) for compliance and remediation of software and patches.

The central Tivoli environment (TPM server and IBM DB2 for RDBMS) will be placed in New York where all central IT operations are located. All critical business applications run off hosts located in San Francisco, but there are also local servers at each location. In New York and San Francisco there are 500 workstations, in San Mateo there are 25 workstations, and in Sacramento there are 10 workstations (all Windows). What is the recommended location for a preferred upload server based on this scenario?

- A. New York
- B. San Mateo
- C. Sacramento
- D. San Francisco

Answer: A

Explanation:

QUESTION NO: 5

Which supported database can be used by IBM Tivoli Provisioning Manager V7.2 on a Windows server?

- A. Informix
- B. IBM DB2
- C. Oracle 11g
- D. Microsoft SQL Server

Answer: B

Explanation:

QUESTION NO: 6

What are the two main catalogs managed by the image library? (Choose two.)

- A. Saved Images
- B. Master Images
- C. Image Discovery
- D. Instances Backup
- E. Versioning Controller

Answer: A,B

Explanation:

QUESTION NO: 7

- A. standard out
- B. TEMP/TCAfiles
- C. Deployment Manager
- D. workflow execution logs

Answer: D

Explanation:

QUESTION NO: 8

What is the documented notification mail server for IBM Tivoli Provisioning Manager V7.2?

- A. IMAP
- B. SMTP
- C. Lotus Notes
- D. Microsoft Exchange

Answer: B

Explanation:

QUESTION NO: 9

What does the VMware Virtual Center Discovery configuration create for each host platform?

- A. saved image
- B. virtual image
- C. virtual server template
- D. versioned master image

Answer: C

Explanation:

QUESTION NO: 10

What is the purpose of a DCD Region?

- A. to improve the runtime performance of the deployment engine
- B. to group depot servers to optimize upload, replication, and download times
- C. to group IBM Tivoli Provisioning Manager computers based on logically related attributes
- D. to group Tivoli Common Agents which subscribe to software packages created in each region

Answer: B

Explanation:

QUESTION NO: 11

Which log indicates server operations for IBM Tivoli Directory Server?

- A. audit.log
- B. ibmslapd.log
- C. /etc/system.log
- D. /tmp/dataServer.log

Answer: B

Explanation:

QUESTION NO: 12

What is the default session timeout for the IBM Tivoli Provisioning Manager V7.2 Web user interface?

- A. 1 hour
- B. 24 hours
- C. 5 minutes
- D. 30 minutes

Answer: D

Explanation:

QUESTION NO: 13

How are permissions assigned to security groups?

- A. with an LDAP management tool
- B. in the WebSphere Administrative Console
- C. using XML and the xmlimport command
- D. in the IBM Tivoli Provisioning Manager Web Interface

Answer: D

Explanation:

QUESTION NO: 14

Which two UNIX requirements are necessary for Tivoli Common Agent installation? (Choose two.)

- A. validate the target computer has wget installed
- B. ensure TCP port 8443 is open on the target computers
- C. target computer command prompt must end in \$, #, or >
- D. ensure this package is installed: compat-libstdc++-33-3.2.3-47.3.i386
- E. suppress /etc/motd display by either creating \$HOME/.hushlogin or removing /etc/motd

Answer: C,E

Explanation:

QUESTION NO: 15

What are three configuration items used by Dynamic Content Delivery (DCD) to determine an optimal download plan? (Choose three.)

- A. Zones
- B. Depots
- C. Peering
- D. Boot Servers
- E. File Repositories
- F. Software Definitions

Answer: A,B,C

Explanation:

QUESTION NO: 16

During the IBM Tivoli Provisioning Manager V7.2 fixpack 2 post installation tasks, which parameter must be changed in the maximo.properties file?

- A. mxe.prop
- B. mxe.name
- C. mxe.value
- D. mxe.workspace

Answer: B

Explanation:

QUESTION NO: 17

In a NAT enabled zone, which option should be specified to enable peering?

- A. preferred upload server
- B. block outgoing requests
- C. block incoming requests
- D. use local IP addresses for peering

Answer: D

Explanation:

QUESTION NO: 18

The workflows to deploy a Device Manager Federated Agent are included with which automation package?

- A. DMAgent.tcdriver
- B. eDMS_LWI.tcdriver
- C. TCA_DMAgent.tcdriver
- D. DMAgent_Federator.tcdriver

Answer: B

Explanation:

QUESTION NO: 19

When an automation package is successfully installed, where are automation package contents found?

- A. \$TIO_HOME/lwi/runtime/drivers
- B. \$TIO_HOME/lwi/runtime/tpm/drivers
- C. \$TIO_HOME/lwi/runtime/tpm/plugins
- D. \$TIO_HOME/lwi/runtime/tpm/eclipse/plugins

Answer: D

Explanation:
