Collaborative Lifecycle Management

Version: 4.0

QUESTION NO: 1

What are three supported CLM clients? (Choose three.)

- A. Eclipse
- B. Oracle Netbeans
- C. Microsoft Visual Studio
- D. Borland Delphi
- E. web browser

Answer: A,C,E

Explanation:

QUESTION NO: 2

Which three sources can CLM use for user authentication? (Choose three.)

- A. browser
- B. LDAP
- C. Tomcat User Registry
- D. non-LDAP external registry services
- E. database server

Answer: B,C,D

Explanation:

QUESTION NO: 3

Which two build engines is Rational Team Concert's Jazz build engine designed to work with? (Choose two.)

- A. Apache Gump
- B. Hudson
- C. CruiseControl
- D. Bamboo

Answer: B,C

Explanation:

QUESTION NO: 4

What limitation is inherited by choosing Apache Derby as the database for the Jazz Team Server?

- A. CLM integrations between RRC and RQM will not work.
- B. The Eclipse client for RTC cannot be used.
- C. The web client for RTC cannot be used.
- D. The deployment will be limited to ten total users.

Answer: D

Explanation:

QUESTION NO: 5

Which statement is NOT true about CLM providing linkages between applications?

- A. Test cases can be linked to work items.
- B. Test cases can be linked to requirements.
- C. Work items can be linked to test plans.
- D. Work items can be linked to test results.

Answer: D

Explanation:

QUESTION NO: 6

What are three limitations when each CLM application has its own Jazz Team Server (JTS)?
(Choose three.)

- A. Applications cannot be consolidated to point to single JTS later on.
- B. The same LDAP server cannot be used for each JTS.
- C. Project areas cannot be managed with the Lifecycle Project Administration application.
- D. Each application cannot be run on its own application server.
- E. A client access license cannot be used on multiple servers.

Answer: A,C,E

Explanation:

QUESTION NO: 7

For which two purposes does CLM use absolute URIs? (Choose two.)

- A. to locate clients attached to the server
- B. to act as a stable resource identification for all applications
- C. to act as a proxy for other systems
- D. to permit consistent web access to stored artifacts
- E. to reduce the size of any URL referencing stored artifacts

Answer: B,D

Explanation:

QUESTION NO: 8

Which statement BEST describes the architecture of Rational Reporting for Development Intelligence (RRDI)?

- A. The report server can only create reports related to Quality Management data.
- B. The content store server extracts, transforms, and loads data into a data warehouse.
- C. The report server uses data collected in the data warehouse to create reports.
- D. The report server must be connected to Rational Publishing Engine to create reports.

Answer: C

Explanation:

QUESTION NO: 9

How does an administrator verify the database status for the Jazz Team Server?

- A. navigate to the administrative page (<https://<your server>:9443/jts/admin>)
- B. open the Eclipse version of RTC and verify the 'server status' viewlet
- C. check the server status light for verification of an active database
- D. view the database schema by opening the DB2 or Oracle control center via the desktop shortcut

Answer: A

Explanation:

QUESTION NO: 10

What is the Operational Data Store (ODS) in Rational Reporting?

- A. the process of collecting data from one or more source, cleansing and transforming it, and then loading it into a database
- B. a standard application programming interface for accessing data in both relational and non-relational databases
- C. a repository that stores copies of a subset of operational data from registered applications
- D. the database that contains the data needed to operate reports, such as report specifications and published reports

Answer: C

Explanation:

QUESTION NO: 11

Which two statements are true about security certificates and CLM? (Choose two.)

- A. The Jazz Team Server includes a self-signed certificate for SSL with the Tomcat Apache Server.
- B. Clients always ignore any security certificates installed on the server.
- C. Security certificates should be purchased from a trusted certificate authority and installed to prevent warnings on the clients.
- D. The Jazz Team Server requires both SSL and TLS certificates.
- E. The Jazz Team Server will not start unless an SSL certificate is installed.

Answer: A,C

Explanation:

QUESTION NO: 12

Which two statements are true about Rational Reporting for Development Intelligence (RRDI)? (Choose two.)

- A. RRDI is a mandatory component included in the CLM installation.
- B. A report authoring license is required to use RRDI with CLM.
- C. RRDI is an optionally installed offering separated from the CLM offering.
- D. There is no additional license or cost to use RRDI with CLM.
- E. A Rational Publishing Engine license is required to use RRDI with CLM.
