LPI 117-010: Practice Test

Question No: 1

When using a web browser, what should a user do to prevent private data from being stored locally?

- A. Browsers can be configured to use a private mode that does not store any data locally.
- **B.** Set up a second profile and use only that one to access sensitive sites.
- **C.** Delete the profile directory in the home directory and create a new one after the work is done.
- **D.** Use the secure versions of the browser available.
- **E.** There is no way to achieve that because Linux always logs network data.

Answer: A
