Question No : 2

Which three are included for each test in the Enterprise Installation Standards (EIS) Test procedure Plan?

- A. The test objective
- B. The test method
- C. The expected outcome of the test
- D. Troubleshooting for each failed test

Answer: A,B,C

Question No : 3

When setting up Oracle VM Server for SPARC on a SPARC 14 server, you did not remove unneeded PCIe devices from control (primary) domain. What is the impact?

- A. PCIe devices from the control domain can no longer be used in I/O domain.
- B. Removing PCIe devices from the control domain for use in I/O domains requires a delayed reconfiguration and a reboot of the control domain.
- C. You can no longer migrate guest domains to another physical system by means of the domain migration Feature.
- D. There is no impact, as PCIe devices can be dynamically reassigned from the control domain to an I/O domain.

Answer: A

Question No : 4

In planning for the installation of a SPARC T4 server, you notice that a more recent version of a patch is available than what is currently on the EIS-DVD. According to the Enterprise Installation Standards (EIS) methodology, what should you do?

- A. Always install the most recent version of a patch
- B. Delay Installation until the updated patch is published to the EIS-DVD
- C. Do not Install the patch, unless instructed to do so by an EIS-Alert
- D. Never Install patches outside of the EIS-DVD

Answer: A

Question No : 5

The SPARC T4-2 server has _____ than the SPARC T4-1 server.

- A. 512 GB more memory
- B. 1 TB more memory
- C. 64 more compute threads
- D. 128 more compute threads

Answer: B

Question No : 6

When replacing the motherboard, how do you preserve the server's original host ID and MAC address?

- A. Move the System Configuration PROM from the old motherboard to the new motherboard.
- B. Back up the service processor configuration details from the old system, and restore on the new system.
- C. Move the service processor card from the old system to the new system.
- D. For security, it not possible to preserve the server's host ID and MAC address.

Answer: A

Question No : 7

Based on the Enterprise Installation Standards (EIS), why should Oracle Explorer Data Collector be run with the “-i” switch after initial system power-on and setup are complete?

- A. To remove confidential customer IP addresses from the Explorer output
- B. To provide a baseline of the initial system configuration
- C. To collect local Intelligent Platform management Interface (IPMI) data
- D. To collect remote Oracle ILOM snapshot data

Answer: C

Question No : 8

What package should be installed if you wish to harden the control domain on a SPARC T4 server running Oracle Solaris 10 and Oracle VM Server for SPARC 2.1?

- A. SUNWldm
- B. SUNWdmp2v
- C. SUNWsst
- D. SUNWjass

Answer: D

Question No : 9

According to the Enterprise Installation Standards (EIS), what is the recommended minimum number of virtual CPUs that should be allocated to the control domain?

- A. 2 CPUs
- B. 4 CPUs

- C. 6 CPUs
- D. 8 CPUs

Answer: D

Question No : 10

What is main objective of having Enterprise Installation Standards (EIS)?

- A. To create a framework for tracking improperly installed systems
- B. To produce consistent, high quality installations
- C. To produce systems optimized for Oracle software deployments
- D. To create a framework for tracking properly installed systems

Answer: B

Question No : 11

How many XAUI (10 GbE Attachment Unit Interfaces) ports are provided per SPARC T4 processor?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: B

Question No : 12

Identify two specification of the Enterprise Installation Standard (EIS) for Basic Solaris.

- A. It defines the process for downloading Solaris and related patches from the Oracle support web site
- B. It requires the Installer to use the appropriate his Installation checklists when Installing Solaris
- C. It mandates that Installers use the EIS-DVD during the Installation process
