Exam 3204

Avaya Aura® Conferencing Implementation and Maintenance Exam

Version: 6.0

[Total Questions: 64]

Question No : 1

A technician is configuring Avaya Aura Conferencing for Turnkey so that it can communicate directly with a SIP trunk that has been configured on Avaya Communication Manager.

Which steps need to be taken to configure Avaya Aura Conferencing for the SIP trunk?

- A. Log into Element Manager, add an address, an external node, and a SIP Entity
- B. Log into Provisioning Client, add an address, an external node, and a SIP Entity
- C. Log into Element Manager, add an address, an external node, and a SIP Profile
- D. Log into Provisioning Client, add an address, an external node, and a SIP Profile

Answer: D

Question No : 2

What does the extension .active at the end of the log file name indicate?

- A. The log is currently closed.
- B. The log is the most recent log file.
- C. The log has been previously opened.
- D. The log is obsolete.

Answer: D

Question No : 3

Where can you modify the alert threshold settings for the Avaya Aura® Conferencing?

- A. Monitoring and Reporting
- B. Key Performance Indicators
- C. OAM Profiles
- D. Feature Server Elements

Answer: B

Question No : 4

A technician is installing Avaya Aura® Conferencing 8.0.

What must be done first so that security certificates can be acquired during installation?

- A. Set the enrollment password on System Manager.
- B. Set the enrollment password on Session Manager.
- C. Get the enrollment password for System Manager.
- D. Get the enrollment password for Session Manager.

Answer: C

Explanation:

The trust management services enables auto enrollment for certificates from System Manager. You are required to know the enrollment password when requesting certificates from the System

Manager. If you already know the enrollment password, you can skip this procedure.

Question No : 5

You downloaded the following file from PLDS:

MCP_18.0.10.4_2012-06-08-1605.zip

The Element Manager Console indicates that conferencing is running version MCP_18.0.10.1_2012-05-25-1355.

Which command will install this file?

- A. patchPlatform.pl
- B. mcpPatchOS.pl
- C. mcpRelease.pl
- D. mcpPatch.pl

Answer: B

Question No : 6

A technician is installing Avaya Aura® Conferencing for the first time, and has acquired the proper hardware needed for the system installation.
