## Exam 646-985

### Data Center Networking Solution Sales

Version: 7.0

[ Total Questions: 50 ]

**Topic break down**

<b>Topic</b>	<b>No. of Questions</b>
<b>Topic 1: Describe the capabilities of a Cisco Data Center solution</b>	<b>13</b>
<b>Topic 2: Describe the business value of a Cisco Data Center solution</b>	<b>12</b>
<b>Topic 3: Analyze customer business requirements</b>	<b>9</b>
<b>Topic 4: Recommend the appropriate Cisco Data Center Network solution and advanced services</b>	<b>8</b>
<b>Topic 5: Understand the competitive positioning of Cisco Data Center solutions</b>	<b>8</b>

**Topic 1, Describe the capabilities of a Cisco Data Center solution****Question No : 1 - (Topic 1)**

Which statement regarding siloed applications is accurate?

- A. Overprovisioning siloed resources is a cost-effective way to anticipate growth.
- B. Committing siloed resources to a specific application allows for high utilization.
- C. The process of deallocating and reallocating siloed resources can be more costly than purchasing new equipment.
- D. Redeploying siloed resources raises capital expenditure (CapEx) but reduces operational expenditure (OpEx).

**Answer: C**

**Question No : 2 - (Topic 1)**

You are interested in lowering your total cost of ownership for your small-scale SAN and data center edge applications. Which device would be the best to use in this scenario?

- A. Cisco Nexus 1000V
- B. Cisco MDS 9124
- C. Cisco GSS 4492
- D. Cisco Catalyst 6500

**Answer: B**

**Question No : 3 - (Topic 1)**

Which statement about full-width blades is true?

- A. Up to eight full-width blades may fit into a single Cisco UCS 5100 enclosure.
- B. Full-width blades feature a pair of Intel Xenon processors.
- C. Full-width blades feature four times as many dual-port adapters as half-width blades.
- D. Full-width blades feature four times as many DIMM slots as half-width blades.

**Answer: D**

**Question No : 4 - (Topic 1)**

What are blade switches?

- A. end-of-row switches
- B. top-of-rack switches
- C. modules that fit into MDS switches
- D. modules that fit into blade server chassis

**Answer: D**

**Question No : 5 - (Topic 1)**

What advantage does Cisco Catalyst 6500 Virtual Switching System (VSS) capability offer?

- A. A Catalyst 6500 Series Switch can be deployed as either a top-of-rack or end-of-row device.
- B. A Catalyst 6500 Series Switch can operate at both the aggregation and core layers.
- C. A pair of Catalyst 6500 Series Switches can operate as a single logical switch.
- D. A pair of Catalyst 6500 Series Switches can combine resources to provide twice as much bandwidth.

**Answer: C**

**Question No : 6 - (Topic 1)**

What is meant by data center virtualization?

- A. the use of a unified fabric to greatly reduce the amount of cable runs
- B. the deployment of devices that can operate as top-of-rack and end-of-row devices at the same time
- C. the consolidation of physical resources and deployment as logical devices
- D. the replacement of physical hardware with virtual machines

**Answer: C**

**Question No : 7 - (Topic 1)**

How does the Cisco ACE XML gateway improve server performance?

- A. by blocking XML traffic to the server
- B. by offloading XML functions from the server
