**Question No : 2**

Which statement describes a FileVault 2 usage requirement?

- A. You can enable FileVault 2 only for admin user accounts.
- B. You can turn off FileVault 2 by starting up the Mac in single-user mode and entering the Master Password at the prompt.
- C. If you lose the admin user password for a Mac that has FileVault turned on, you can retrieve its user data by restarting the Mac in Target Disk Mode.
- D. You must authenticate as an admin user to turn on FileVault 2.

**Answer: D**

**Question No : 3**

Diego wants to run a Windows-based application on a MacBook Pro. What is a valid reason for him to use Boot Camp rather than a virtual VMware Fusion?

- A. Diego can buy Boot Camp on the App Store for \$9.99, which is less expensive than the virtual solutions.
- B. Boot Camp lets Diego switch between OS X and Windows applications instantly, whereas virtual solutions require Diego to restart his MacBook Pro to switch between the two environments and their applications.
- C. Boot Camp runs natively without hardware-resource contention on Mac computers, so

Diego will see better overall performance with BootCamp than with virtual solutions.

**D.** Boot Camp does NOT require Diego to buy and install Windows to run Windows-based applications, whereas virtual solutions do.

**Answer: C**

**Question No : 4**
