In the screenshot, click the icon of the preference pane where you configure a Mac to bind to an Active Directory server.

Answer:

Question No : 5

In the context of computers on a network, what does "bind" mean?

A. To configure a computer to connect to a directory server
B. To configure a computer to prevent it from accessing data on the network
C. To configure a firewall on a computer to restrict inbound traffic
D. To configure a computer to connect to a network

Answer: A

Question No : 6

You want to run a Windows-based application on a Mac. Which of these is a valid reason to use Boot Camp rather than a virtual solution like Parallels or VMware Fusion?

A. You can buy Boot Camp on the App Store for $9.99, which is less expensive than the virtual solutions.
B. Boot Camp runs natively without hardware-resource contention on Mac computers, so you'll see better overall performance with Boot Camp than with virtual solutions.
C. Boot Camp doesn't require you to buy and install Windows to run Windows based applications, whereas virtual solutions do.
D. You can use Boot Camp to switch between OS X and Windows applications instantly, whereas virtual solutions require you to restart your Mac to switch between the two environments.

Answer: B

Question No : 7
