SAP

Exam C-BOE-30

SAP Certified Application Associate – SAP BusinessObjects Enterprise XI 3.x

Version: 6.0

[Total Questions: 239]

Topic 1, Volume A

Question No : 1 - (Topic 1)

Which Crystal Reports Page Server setting should you use to prevent users from running on-demand reports containing queries that return excessively large record sets?

A. SQuestionL_MAX_ROWS
B. Limit SQuestionL Cursor Fetch Size
C. Preview Sample Data
D. Database Records to Read When Previewing or Refreshing a Report

Answer: D

Question No : 2 - (Topic 1)

Your currently run you BusinessObjects Enterprise system on multiple servers. You want to add another Crystal Reports Job Server service to the machine running the Crystal Reports Job Server service. Using the Add Server Wizard in the Central Configuration Manager, which three tasks must you perform? (Choose three.)

A. Synchronize the server
B. Start the server
C. Create the server
D. Enable the server

Answer: B,C,D

Question No : 3 - (Topic 1)

When a scheduled Crystal Report runs successfully, which server notifies the Central Management Server (CMS) of the instance status?

A. Crystal Reports Page Server
B. Output File Repository Server
C. Crystal Reports Job Server
D. Web Application Server

Answer: C

Question No : 4 - (Topic 1)

Which three statements describe the role of the Web Intelligence Report Server?

(Choose three.)

A. Fulfills on demand Web Intelligence report requests
B. Updates the Central Management Server (CMS) with instance status
C. Processes scheduled Web Intelligence report requests
D. Creates report instances for Web Intelligence report reports

Answer: A,C,D

Question No : 5 - (Topic 1)

Which two statements describe situations that will benefit from using server groups?

(Choose two.)

A. You intend to cluster the Central Management Server (CMS).
B. Datasources are located in geographically dispersed locations.
C. Some processing servers are configured for specific databases.
D. You are using a web farm.

Answer: B,C

Question No : 6 - (Topic 1)

When you install BusinessObjects Enterprise, what is the minimum disk space required for the drive holding the TEMP directory?

A. 100 MB
B. 500 MB
C. 700 MB
D. 1000 MB

Answer: C

Question No : 7 - (Topic 1)

What is a requirement for a client running the Central Management Console?

A. The Publishing Wizard must be installed
B. All BusinessObjects Enterprise servers must be installed
C. Network connectivity to the Central Management Server (CMS)
D. Network connectivity to the Production Database

Answer: C

Question No : 8 - (Topic 1)

Where do you configure the BusinessObjects Enterprise Web Component Adapter (WCA)?

(Choose two.)

A. wcaconfig.ini file in the InfoView directory
B. web.config file in the WebContent directory
C. Central Configuration Manager
D. Central Management Console

Answer: A,B

Question No : 9 - (Topic 1)

When you install BusinessObjects Enterprise, a number of options are available from the initial Install type screen. Select three of the options that appear on this screen. (Choose three.)

A. Expand
B. New
C. Custom
D. Silent Installation

Answer: A,B,C

Question No : 10 - (Topic 1)

When does Crystal Reports communicate with the BusinessObjects Enterprise infrastructure?

A. When opening a report from the Enterprise folders
B. When opening a successful report instance sent as an email attachment by the Crystal Reports Job Server
C. When importing a Crystal Reports from the Input File Repository Server (FRS)
D. When scheduling a Crystal Reports from the Central Management Console (CMC)

Answer: A

Question No : 11 - (Topic 1)

Where does the list of Values (LOV) Job Server store reports when it processes scheduled List of Value objects?

A. Input File Repository Server
B. Output File Repository Server
C. Repository Manager
D. Central Management Server (CMS) System Database

Answer: B

Question No : 12 - (Topic 1)

What is the recommended value for the Maximum Simultaneous Report parameter of the

Desktop Intelligence Report Server?

A. Two greater than the Number of Preloaded Report Jobs value
B. Two less than the Number of Preloaded Report Jobs value
C. The same value set for Number of Preloaded Report Jobs
D. No more than fifty per processor

Answer: A

Question No : 13 - (Topic 1)

A user schedules a Crystal Report. What step does the Crystal Reports Job Server take when the Schedule time is reached?

A. Starts a JobServer thread to run the report
B. Spawns a JobServerChild process to run the report
C. Contacts the Crystal Reports Page Server for the location of the report
D. Runs the report immediately by opening the report from the Input File Repository Server (FRS)

Answer: B

Question No : 14 - (Topic 1)

Which four servers are involved in processing a scheduled List of Values (LOV) object?

(Choose four.)

A. Input File Repository Server
B. Crystal Reports Job Server
C. Output File Repository Server
D. List of values Job Server
E. Central Management Server

Answer: A,C,D,E

Question No : 15 - (Topic 1)

Which four servers are involved in processing a scheduled Program object? (Choose four.)

A. Input File Repository Server
B. Output File Repository Server
C. Program Job Server
D. Destination Job Server

E. Central Management Server

Answer: A,B,C,E

Which characteristic of the Web Intelligence Job Server enables it to provide stability and efficiency for running large or complex reports?

A. Runs jobs as individual processes
B. Runs jobs using a sync-safe threads
C. Uses them ark-and-sweep garbage collection algorithm
D. Uses hash tables and smart pointers

Answer: A

You design a Crystal Report on your own computer. The report connects to an Oracle database using ODBC. You wish to publish the report to your BusinessObjects Enterprise environment to enable users to view it on demand. Which are requirements for viewing the report on demand? (Choose two.)

A. The Crystal Reports Page Server must have a system DSN matching the DSM created on the report designer's machine.
B. The Crystal Reports Job Server must have a system DSN matching the DSM created on the report designer's machine.
C. The Crystal Reports Page Server must have a user DSN matching the DSM created on the report designer's machine.
D. The Crystal Job Page Server must have a user DSN matching the DSM created on the report designer's machine.

Answer: A,B

In which two locations can you create List of Values (LOV) objects? (Choose two.)

A. Business View Manager

B. Crystal Reports

C. Central Management Console

D. List of Values Job Server

Answer: A,B

Question No : 19 - (Topic 1)

Where does the Web Intelligence Report Server send a Web Intelligence Report after it generates the report to make it available to users on demand?

A. Web Intelligence Job Server

B. Output File Repository Server (FRS)

C. Web Application Server (WAS)

D. Report Application Server (RAS)

Answer: C

Question No : 20 - (Topic 1)

Which three .NET InfoView login page properties can you configure? (Choose three.)

A. Central Management Server (CMS) name that shows on the login page

B. Default user name that appears on the login page

C. Application name that appears in the title bar of the web browser

D. Authentication type that displays on the login page

Answer: A,C,D

Question No : 21 - (Topic 1)

Which parameter for the Crystal Reports Page Server enables you to trade-off between the number of database licenses used and the performance that can be expected for certain types of reports?

A. SQuestionL_MAX_ROWS

B. Always Share Report Jobs

C. Limit SQuestionL Cursor Fetch Size

D. Report Job Database Connection

Answer: D

Question No : 22 - (Topic 1)

Which two settings should you modify to allow the Crystal Reports Page Server to fulfill new requests using data that was generated to meet a previous request? (Choose two.)

A. Refresh Data if Needed

B. Enable Real Time Caching

C. Oldest On-Demand Data Given to a Client

D. Viewer Refresh Always Yields Current Data

Answer: C,D

Question No : 23 - (Topic 1)

The Enterprise Infrastructure provides the basic messaging mechanism needed for BusinessObjects Enterprise components to communicate with one another. The Enterprise Infrastructure is a series of services that are designed to communicate via CORBA, which runs over TCP/IP. What does CORBA stand for?

A. Common Object Request Broker Application

B. Common Object Request Broker Architecture

C. Common Object Request Basic Application

D. Common Object Request Basic Architecture

Answer: B

Question No : 24 - (Topic 1)

Where do you create server groups?

A. InfoView

B. Central Management Console

C. Central Configuration Manager

D. All of the above

Answer: B

Question No : 25 - (Topic 1)

Which option is a performance setting for the Destination Job Server in the Central Management Console (CMC)?

A. NetWork Packet Size

B. Maximum Job Allowed

C. Network Adapter Speed

D. Data Socket Buffer Size Equal to Block Size

Answer: B

Question No : 26 - (Topic 1)

Which setting enables you to limit how long the content for Web Intelligence Reports is stored in cache?

A. Web Intelligence Cache Server Cache Block Timeout

B. Web Intelligence Report Server Document Cache Duration

C. Web Intelligence Report Server Document Cache Scan Interval

D. Web Intelligence Cache Server Oldest On-Demand Data Given to Clients

Answer: B

Question No : 27 - (Topic 1)

Which two statements describe the role of Report Application Server? (Choose two.)

A. Creates .EPF pages for users using the Advanced DHTML Viewer

B. Creates .EPS pages for users using the on demand viewer

C. Processes List of Values (LOV) reports
