## Exam C2010-651

### Fundamentals of Applying Maximo Asset Management Solutions V3

Version: 6.0

[ Total Questions: 143 ]

**Topic 1, Volume A****Question No : 1 - (Topic 1)**

The Assets application is configured so that under certain conditions, for example if the Asset status is Decommissioned, the Spare Parts tab will not be visible. What is needed to complete the task of hiding the Spare Parts tab?

- A. Use the Person Groups application to enable a related signature option.
- B. Use the Conditional Expression Manager application to create this condition.
- C. All of the stated configuration changes can be done using the Application Designer.
- D. This is no longer a configuration task but a customization effort and the Automation Scripting application must be used.

**Answer: B**

**Question No : 2 - (Topic 1)**

What is used to compare the estimate versus actual cost for a job?

- A. The project cost accounting application
- B. Job plan resources and actual resources
- C. Work plan resources and actual resources
- D. GL debit accounts and GL credit accounts

**Answer: C**

**Question No : 3 - (Topic 1)**

Which option enables a direct IBM Maximo Asset Management to Cognos integration without a need to purchase additional Cognos licenses?

- A. Use the External Reporting Integration
- B. Use the Maximo Integration Framework
- C. Use existing licenses of Cognos Reporting
- D. Use existing licenses of Tivoli Common Reporting

**Answer: C**

**Question No : 4 - (Topic 1)**

When determining a customer's inventory issues, what are two factors that should be considered? (Choose two.)

- A. labels
- B. access
- C. shelving
- D. shrinkage
- E. replenishment

**Answer: D,E**

**Question No : 5 - (Topic 1)**

What are three key components that are part of IBM SmartCloud Control Desk? (Choose three.)

- A. Calibration
- B. Service Catalog
- C. IT Asset Management
- D. Assignment Scheduler
- E. Service Request Manager
- F. IBM for Healthcare Solution

**Answer: B,C,E**

**Question No : 6 - (Topic 1)**

Which item describes the basic concept of Total Productive Maintenance which is a maintenance methodology that a customer may subscribe to?

- A. fix it before it breaks
- B. all assets in use, generating value
- C. all maintenance personnel in use, productively
- D. zero error, zero work-related accidents, and zero loss

**Answer: D**

**Question No : 7 - (Topic 1)**

In what way is the user interface (UI) that the Automation Scripting application uses different from all other IBM Maximo Asset Management applications?

- A. It does not rely on Maximo objects.
- B. It is created using only Jython code.
- C. It can be invoked and used in other external systems.
- D. It is wizard driven and other IBM Maximo applications use tabs to navigate the user.

**Answer: D**

**Question No : 8 - (Topic 1)**

Which type of location can be associated with systems?

- A. Labor
- B. Repair
- C. Vendor
- D. Operating

**Answer: D**

**Question No : 9 - (Topic 1)**

What is a factor when determining the number of concurrent users for sizing an environment?

- A. the number of BIRT/Cognos reports to be viewed
- B. the users to be supported for logging in concurrently
- C. the number of licenses purchased in the sales contract
- D. the time before the system logs users out based on inactivity

**Answer: B**

**Question No : 10 - (Topic 1)**

PMs are generating automatically and the schedule needs to be changed for a single PM. What is the best way to achieve this?

- A. Revise the PM with the new date
- B. Change the status and edit the last date
- C. Edit the next due date and reset the count
- D. Set the extended date and adjust next date

**Answer: D**

**Question No : 11 - (Topic 1)**

To prepare for detailed Reliability' Centered Maintenance (RCM) analysis, important decisions need to be made regarding the way equipment is classified from the main system to subsystem and within unit levels. This must be done in a way that is consistent with the existing maintenance strategy, tasks, routines, and levels of unit replacement. Which features and functions enable the classification and navigation through this structure?

- A. Drill Down and Classification
- B. Drill Down and Select Action
- C. Classification and Service Catalog
- D. Select Action and Service Catalog

**Answer: A**

**Question No : 12 - (Topic 1)**

What is the default reporting solution for IBM Maximo Asset Management as shipped with the product?

- A. Crystal Reporting
- B. IBM Tivoli Common Reporting
- C. IBM Cognos Business Intelligence
- D. Business Intelligence Reporting Tool

**Answer: D**

**Question No : 13 - (Topic 1)**

What is already managed in a freshly installed IBM Maximo Asset Management solution with minimal data set up?

- A. allowance for bad debts
- B. planned and unplanned activities
- C. employee work validation reports
- D. stress fractures in asset components

**Answer: B**

**Question No : 14 - (Topic 1)**

A customer would like to monitor meter readings on certain assets and have the system automatically generate work orders. They would like to configure upper and lower limits for specific meters and define different tasks when each limit is reached. Which functionality in IBM Maximo Asset Management will meet this business requirement?

- A. Flow Control
- B. Condition Monitoring
- C. Integration Framework
- D. Preventive Maintenance

**Answer: B**

**Question No : 15 - (Topic 1)**

What are two business areas or processes that are supported by the IBM Maximo Asset Management solution? (Choose two.)

- A. Budget Allocation
- B. Fleet Management
- C. Workforce Management
- D. Work Order Management
- E. Procurement Management

**Answer: D,E**

**Question No : 16 - (Topic 1)**

Preventive maintenance tasks can be created for which three types of records in IBM Maximo Asset Management? (Choose three.)

- A. Tool
- B. Item
- C. Route
- D. Asset
- E. Location
- F. Work Order

**Answer: C,D,E**

**Question No : 17 - (Topic 1)**

What is a valid (default-provided) option for security configuration schemes?

- A. using Tivoli process automation engine (TPAE) to create users and control authorization
- B. using third-party applications to create, authenticate, and authorize users
- C. using TPAAE to create users and using LDAP source to import securely groups
- D. using the LDAP application to create users and using TPAAE to authenticate users

**Answer: A**

**Question No : 18 - (Topic 1)**

Which function has the ability to integrate with external applications through Web Services?

- A. Maximo Integration Framework
- B. IBM Tivoli Integration Composer
- C. Maximo Integration and Solution Manager
- D. IBM Tivoli Integration Service Automation Manager

**Answer: A**

**Question No : 19 - (Topic 1)**

Integrating with external systems occurs using many methods such as employing JMS queues, using Web services, and application import and export functionality'. What best describes the difference between using JMS queues versus the Interactions (Web services) application?

- A. The Web service interactions will avoid creating JMS queues.
- B. JMS queues are typically asynchronous events, and Web services are synchronous events.
- C. JMS queues require `.jmsqueueconsumer` cron and the Web services require `webservicesconsumer` cron.
- D. JMS queues are used to import and export bulk transactions data such as inventory items, and Web service interactions are used to import and export non transactional data.

**Answer: B**

**Question No : 20 - (Topic 1)**

What do real-time dashboards support?

- A. asset control
- B. asset display
- C. asset visibility
- D. asset automation

**Answer: C**

**Question No : 21 - (Topic 1)**

What is a clear indicator that more than one organization is required to be created at the customer site?

- A. multiple start centers
- B. more than 5,000 users
- C. more than one production environment
- D. requirement for more than one base currency

**Answer: D**

**Question No : 22 - (Topic 1)**

What is a possible line type value on a purchase order line?

- A. Asset
- B. Material
- C. Inventory
- D. Standard Tool

**Answer: B**

**Question No : 23 - (Topic 1)**

A customer has indicated that anybody in the company is able to complete a paper-based requisition but there are problems with these requisitions going missing from the supervisor's desk. Which function can be used in IBM Maximo Asset Management to electronically submit requisitions in a wizard-like fashion without a lot of user training?

- A. Purchase Orders
- B. Desktop Requisitions
- C. Purchase Requisitions
- D. Request for Quotations

**Answer: B**

**Question No : 24 - (Topic 1)**

Which application is used to create release purchase orders?

- A. Releases
- B. Purchase Orders
- C. Purchase Contracts
- D. Purchase Requisitions

**Answer: C**

**Question No : 25 - (Topic 1)**

What are two correct statements regarding the use of sites? (Choose two)

- A. Each site can have its own distinct base currency.
- B. Each site must correspond to an actual location hierarchy.
- C. All sites use the same instance of IBM Maximo Asset Management (Maximo) running on an application server.
- D. Once a site is created the record cannot be deleted through the user interface; however, the site can be made inactive.
- E. Different sites keep certain operations separate according to the needs of their business practices and the constraints of the Maximo architecture.

**Answer: C,E**

**Question No : 26 - (Topic 1)**

Which task needs to be performed before Application Import/Export can be enabled?

- A. Admin Mode must be turned on.
- B. An Object Structure must be created of type INTEGRATION.
- C. The application needs to be reconfigured in Application Designer.
- D. A dedicated JMS queue must be created and linked to the APPIMPORT external system.

**Answer: B**

**Question No : 27 - (Topic 1)**

Which two key capabilities are essential for executing an effective gap-fit analysis? (Choose two.)

- A. detailed understanding of the as-is and to-be customer organization
- B. detailed knowledge of the reference architecture from the standard software
- C. detailed understanding of certain characteristics and components of the customer organization
- D. detailed understanding of the capabilities of the software that are candidates for implementation
- E. detailed understanding of the as-is and to-be customer Enterprise Asset Management business processes
