Answer: C

Question No : 10

After upgrading an IBM Tivoli Composite Application Manager (ITCAM) for Transactions

installation (for example, from V7.1 to V7.3). the Transaction Reporter topology view no longer displays certain components that had been displayed in the previous version for items such as WebSphere MQ. IMS. CICS. and WebSphere Message Broker.

How is this issue resolved?

A. stop all Collector agents, remove the ttas.' files, then restart the agents
B. stop the Reporter agent, remove the todata directory, then restart the agent
C. launch the Application Management Configuration Editor, switch to the Profiles view, expand Transactions Tracking, select Default, and click Add to add the missing applications into the default profile
D. in the Tivoli Enterprise Portal's Transactions workspace of the reporter agent navigate to the transactions, right-click the transaction, click Take Action, click Select, then scroll down and choose Forget Topology

Answer: C

Question No : 11

See the Exhibit below.

Aggregation Periods			
Start Timestamp	End Timestamp	Number of records	Number of excluded records
11/02/12 04:30:00	11/02/12 04:35:00	204	0
11/02/12 04:35:00	11/02/12 04:40:00	208	0
11/02/12 04:40:00	11/02/12 04:45:00	181	0
11/02/12 04:45:00	11/02/12 04:50:00	70	0
11/02/12 04:50:00	11/02/12 04:55:00	68	0
11/02/12 04:55:00	11/02/12 05:00:00	43	0

What can be determined (torn this view?

A. The rate of transactions coming into this Transaction Reporter are increasing.
B. The rate of transactions coming into this Transaction Collector are increasing.
C. The rate of transactions coming into this Transaction Reporter are decreasing.
D. The rate of transactions coming into this Transaction Collector are decreasing.

Answer: A

Question No : 12
