Rational Application Developer v7

Version: 6.0

[Total Questions: 59]

Question No : 1

Which view best displays the list of all callers and callers of a selected method?

- A. Call Hierarchy
- B. Hierarchy
- C. Outline
- D. Package Explorer

Answer: A

Question No : 2

When creating a session bean, the default selection for the session bean is to create a remote client view instead of a local client view. This is because:

- A. Even though a local clientview is available, it is a best practice to never use a local client view in a session bean.
- B. Session beans are normally used to implement facades, and as such, require remote interfaces as opposed to local interfaces.
- C. A remote client view is easier to use.
- D. Local client view for session beans has been deprecated.

Answer: B

Question No : 3
