- C. The users do not have access to the Web Server distribution folder.
- D. The users do not have access to C:\Program Files\LANDesk\LDClient\SDMCache directory.

**Answer: B**

**Question No : 8 - (Topic 0)**

What are the correct distribution script parameters used to execute an MSI package displaying its native interface in a high-bandwidth availability environment?

- A. /fui /bw=lan /msi
- B. /msi /bw=ras /all
- C. /msi /fui /bw=high
- D. /exe /msi /all /bw=any

**Answer: A**

**Question No : 9 - (Topic 0)**

You have modified a user's rights and scope. When will these changes take effect?

- A. immediately
- B. when the user reboots his machine
- C. when the LANDesk?Policy Server service is restarted
- D. when the user logs in to the LANDesk?Management Suite console

Answer: D

**Question No : 10 - (Topic 0)**

For which two functions can the LDdiscover utility be used? (Choose two.)

- A. agentless inventory
- B. deploy the LANDesk? client
- C. unmanaged device discovery
- D. login script-based deployment

Answer: A,B

**Question No : 11 DRAG DROP - (Topic 0)**

Click the Task button. You want to monitor the number of licenses being used on your network for Microsoft Office XP Professional. Place the steps in the correct order to accomplish this task.

1. Position the tip of the mouse cursor over the object you want to move (usually a panel, picture, or words).
2. Click and hold down the left mouse button.
3. Move the mouse (without releasing the mouse button) to move or "drag" the object.
4. Position the object so that its *upper left corner* is over the place you want it to go.
5. Release the mouse button to place or "drop" the object into its new location.

Hint: You can tell where to drop objects by watching the mouse cursor.

- Remember that the mouse's "hot spot" is the very tip of the cursor arrow. So, when dragging, place the tip of the mouse cursor arrow over the place you want to drop the object, *even if the object itself is not lined up with its target.*
- The mouse cursor changes shape as you drag objects around the screen. The cursor shape indicates where you can drop objects. See the table below.

Status	Cursor	Example	Status	Cursor	Example
OK to Drop			NOT OK to Drop
