Exam M2010-649

M649 IBM Rational Systems & Software Engineering Sales Mastery Test v2

Version: 6.1

[Total Questions: 36]

Question No : 1

Why is systems design not as effective when using document or text-based approaches?

- A. Model-based approaches manage complexity via abstraction; document-based approaches do not.
- B. Unlike document-based approaches, model-based approaches are linear and transparent.
- C. Model-based approaches can ensure that all regulatory demands are met.
- D. Document-based approaches tend to be more expensive than model-based approaches.

Answer: A

Question No : 4

How does Rhapsody help reduce development time?

- A. It automatically makes adjustments for changes in concept.
- B. It manages the workload for the entire project.
- C. It generates applications and documentation from the design model.
- D. It imports design data from existing reports and documentation.

Answer: C

Question No : 5

A customer tells you: "Many of my colleagues are working on their own specifications, so I am never sure where the latest requirements are or what the status is."

How can Rational DOORS help them solve their problem?

- A. With DOORS' change management capabilities, you can record a change request to communicate the status of the requirement.
- B. The DOORS merge feature will allow the specifications to be combined at a later time.
- C. The best practice is to have everyone work separately to ensure there aren't any requirements ownership issues.
- D. DOORS stores all information in a central repository so that you know you are looking at the latest approved requirements.

Answer: A
