Which of the following describes how to transfer multiple values between two XAL elements?
Choose the 2 that apply.

MB5-854

- A. Use the command EXTERN to gain access to an external buffer that another element has created
- B. Use the command FIND to gain access to an external buffer that another element has created
- C. Use the global variable & Parm to transfer key values between two Elements
- D. Use the global variable & Parm to transfer key values between two elements

Answer: A, D

QUESTION NO: 5

Which macro types are found in C5?

- A. Local macros and Global macros
- B. Local macros, Global macros and macro Libraries
- C. Local macros, Global macros, macro Libraries and DbUpdate macros
- D. Local macros, Global macros, macro Libraries, DbUpdate macros and Txt Macros

Answer: B

QUESTION NO: 6

How many different kinds of variables/data types are there in total in the XAL programming language?

- A. 1
- B. 2
- C. 5
- D. 6

Answer: C

QUESTION NO: 7

Which of the following describes functions to choose with F2?

- A. Functions in the XAL language must have parameters to return a value
- B. Functions are recognized in the XAL language by the name being followed by a set of normal brackets with or without parameters

MB5-854

- C. Use table buffers as parameters to the functions
- D. When using table buffers in a function, you must remember to transfer ReclD as the first parameter after the buffer

Answer: B

QUESTION NO: 8

A message needs to be added to an information box indicating the system is running as Supervisor. Which code example will you use?

- A. IF CurUserID()=1 THEN SET Box(1,"Supervisor is in",0) ENDIF
- B. IF CurUserID()==1 THEN SET Box(3,"Supervisor is in",1) END
- C. IF CurUserID()=1 THEN SET Box(2,"Supervisor is in",0) ENDIF
- D. IF CurUserID()==1 THEN SET Box(1,"Supervisor is in",0) ENDIF

Answer: D

QUESTION NO: 9

How do you ensure the size of all entry fields in a prompt box is 15 characters?

- A. Follow the command PROMPT with LENGTH ALL 15
- B. Insert the command PROMPT 15 on each individual line with a LENGTH Command
- C. Follow the command PROMPT with LENGTH (ALL,15)
- D. Insert the command LENGTH 15 on each individual line with a GET Command

Answer: D

QUESTION NO: 10

Which command generates a new blank screen in an XAL run?

- A. WINDOW
- B. WINDOW 0, 0
- C. CLEARSCREEN
- D. CLS
