AX 2009 Product Builder

Version: 4.0

QUESTION NO: 1

You are a Product Designer responsible for creating a table constraint. Now it is time to add it to the product model. How can you accomplish this?

A. Add the table constraint to the model as one of the validation rules.
B. Attach the table constraint to the model from the Table constraints form.
C. Add the table constraint to the Table constraints tab and then add related modeling variables to the Modeling variables tab
D. Add the table constraint to the Table constraints tab Related Table variables are added to the model automatically.

Answer: D
Explanation:

QUESTION NO: 2

You are a Product Designer responsible for creating product models. Your task is to create a model for a home theater. The home theater dimension calculation you plan to implement in the modeling tree is rather complex and depends on a number of factors. If this calculation fails, you want the user to view an error message and to abort the configuration. What must you implement to abort the configuration if the calculation fails?

A. Create an Action rule.
B. Create a Constraint rule.
C. Create a Message node of the error type. It automatically aborts the configuration.
D. It is not necessary to implement anything. In case some calculation fails the configuration is always aborted and a standard error message is displayed.

Answer: C
Explanation:

QUESTION NO: 3

You are a Product Designer in the Contoso Company. You create a product model for a home theater. The theater has the following options: Television: CRT, LCD, Plasma Number of speakers: 2, 3, 5 Speaker height: 30.5, 45.5, 50.5 Which type of variables do you use to make each option available in the Product Builder configuration form?

A. Enumerated text variable for the first option, Integer for the second, and Real for the third
B. Enumerated text variable for the first option, Real for the second, and Integer for the third

C. Enumerated text variables for the first and third options, and Real for the second
D. Enumerated text variable for the first, second, and third options

Answer: D
Explanation:
