Exam S10-110

Storage Networking Foundations Exam

Version: 7.0

[Total Questions: 65]

Question No : 1

What is a set of data processing components that are automatically provisioned by providers, accessed over a network, and provides secure multi-tenancy?

A. network infrastructure
B. database infrastructure
C. storage infrastructure
D. cloud infrastructure

Answer: D

Question No : 2

Which two statements are true about archiving? (Choose two.)

A. Archiving is an open source technology based on Cinder and OpenStack.
B. B. The purpose of archiving is the long term preservation of information.
C. C. Archiving can be used as a response to meet regulatory requirements.
D. Archiving is performed exclusively to tape.

Answer: B,C

Question No : 3

Which storage technology uses optics for connectivity?

A. LTO tape
B. SAS
C. SATA
D. Fibre Channel
E. iSCSI

Answer: D

Question No : 4

What are three iSCSI configuration optimization techniques? (Choose three.)

A. Combine iSCSI data traffic with management IP traffic for maximum efficiency.

B. B. Enable jumbo frames

C. Isolate iSCSI traffic from other IP frames.

D. Place a firewall between initiators and targets for security

E. Enable flow control on switches.

Answer: B,C,E

Question No : 5

Which two technologies are part of the Data Center Bridging (DCB) standard? (Choose two.)

A. Priority-based Flow Control (PFC)

B. B. Enhanced Transmission Selection (ETS)

C. C. Fibre Channel over IP (FCIP)

D. Internet key Exchange (IKE)

Answer: A,B

Question No : 6

What are two requirements of a server cluster with regards to storage technologies? (Choose two.)

A. a switch fabric

B. B. a file locking mechanism

C. C. a back-end storage database

D. shared storage

Answer: A,D

Question No : 7

At which point in the communication chain is multi-pathing initiated?

A. the operating system device driver level

B. the switch level

C. the storage array level
D. the physical cable interface level

Answer: C

Question No : 8

What are two NAS file access protocols? (Choose two.)

A. SMB
B. B. iSCSI
C. NFS
D. FCP

Answer: A,C

Question No : 9

Which type of device would you typically use for file access storage?

A. SAN
B. NAS
C. DAS
D. HBA

Answer: B

Question No : 10

At which level would you apply LUN masking?

A. file system level
B. switch level
C. zone alias level
D. controller level

Answer: B
