Veritas

Exam VCS-316

Administration of Veritas Backup Exec 2012

Version: 6.0

[Total Questions: 238]

Question No : 1

Why is it important to use only one VSS provider when protecting VMware virtual machines hosting applications?

A. Multiple VSS providers can cause backup server stability issues.
B. Multiple VSS providers can result in backup data corruption.
C. Multiple VSS providers can cause quiesce and other snapshot errors.
D. Multiple VSS providers can result in backup duplication.

Answer: C

Question No : 2

How can an administrator reduce the impact on the production network on restore jobs?

A. enablesSymantec Backup Exec network throttling
B. use a separate backup network
C. use deduplicated backup
D. use Simplified Disaster Recovery

Answer: B

Question No : 3

What is supported by Symantec Backup Exec 2012?

A. Windows NT 4.0
B. Lotus Domino
C. Tivoli Storage Manager
D. Microsoft Data Protection Manager

Answer: C

Question No : 4

Which command will start the Agent for Linux?

A. /etc/init.d/VRTSralus start

B. service start VRTSralus

C. SystemStarter start VRTSralus

D. /sbin/init.d/VRTSralus

Answer: A

Question No : 5

What is an invalid option under Ranges when attempting to run a Backup Resource Success Rate report?

A. the number of days before the report runs

B. the number of hours within the time the report runs

C. the maximum number of events to include in the report

D. the minimum number of events to include in the report

Answer: D

Question No : 6

Which example illustrates an unsupported deduplication scenario?

A. client-side deduplication of a WAN attached server

B. server-side deduplication of an Exchange server

C. client-side deduplication of VMware ESX host server

D. server-side deduplication of Hyper V server

Answer: C

Question No : 7

Media can be deleted from which media set?

A. Cleaning Media

B. Scratch Media

C. Retired Media

D. Foreign Media

Answer: C

Question No : 8

What is the default backup configuration in Symantec Backup Exec 2012?

A. monthly full, daily incremental
B. monthly full, daily differential
C. weekly full, daily incremental
D. weekly full, daily differential

Answer: C

Question No : 9

Answer: A

Question No : 21

Scanners configured for IM filtering act as a security proxy for which type of traffic?

A. public network IM traffic
B. enterprise IM traffic
C. encrypted IM traffic
D. internal IM traffic

Answer: A

Question No : 22

A backup job failed with an access denied error message. Which option in the backup job property can be used to set the correct permissions?

A. verify credentials

B. user account credentials

C. validate credentials

D. test/edit credentials

Answer: D

Question No : 23

Which two components must be installed on a new target server before Exchange data can be redirected to that server? (Select two.)

A. MAPI Collaborative Data Objects

B. Agent for Windows

C. Agent for Applications and Databases

D. Microsoft Exchange

E. Exchange Management tools

Answer: B,D

Question No : 24

The Symantec Backup Exec 2012 V-Ray Edition includes agents to protect which application?

A. IBM DB2

B. SAP R3

C. Oracle 11g R2

D. Sybase

Answer: C

Question No : 25

A customer needs duplicates of a backup on disk and tape and prefers to store the tape off-site. Which method should the customer use to minimize backup time?

A. back up using Physical to Virtual (P2V)

B. back up to disk and tape using deduplication

C. back up to disk and add stage to duplicate to tape

D. back up using multi-streaming to go to tape and disk simultaneously

Answer: C

Question No : 26

When are backup files on disk storage devices removed by Symantec Backup Exec 2012?

A. when the overwrite period falls to 0

B. when the backup set has expired

C. when the low disk space threshold is reached

D. eight hours after a low storage event

Answer: B

Question No : 27

Client-side deduplication is unsupported on which operating system?

A. Novell OES 2

B. Red Hat 5.5

C. SUSE 11

D. Windows 2003 R2

Answer: A

Question No : 28

Which Symantec Mail Security 8300 appliance is configured for RAID 10?

A. 8320

B. 8340

C. 8360

D. 8380
